

I can fully understand the problems the commission and the public is having with the indecency problem on radio. I am very much against indecent or vulgar language in broadcasting, and i think most broadcasters are. The problems are coming from just a few, mostly in larger markets. I think it is unfair to penalize everyone for what just a handful are doing, by making us record and store our daily programming..Many of us in the smaller markets live from pay check to pay check, there are not a lot of big profits and having to spend a large amount of money on recording equipment is going to be cost prohibitive for some of us, plus the cost of storing tapes for 90 days..the majority of us run good clean operations, if we didnt in our market i know someone would be complaining.Please reconsider penalizing all of us and go after the guys who are causing the problems..thanks for your time...Lee Anderson, General Manager and soon to be owner of the Mc Alester Radio Stations...
